## TERRITORIO

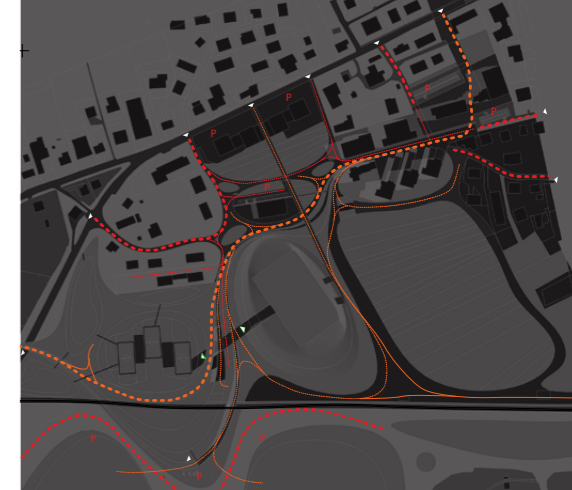

1. Posizione ferroviaria del comune di S. Giustina rispetto alla direttrice Belluno - Feltre
2. Scala urbana: le risorse create dai tracciati delle strade statali e dalla ferrovia
3. Scala urbana - progetto: creazione di un livello percettivo perfetto che lega elementi storico-culturali e di paesaggio
4. Progetto: nuova stazione ferroviaria posizionata a sud dell'area di progetto. L'intervento procede con la riorganizzazione con nuove destinazioni d'uso.
5. Progetto: creazione del nuovo paesaggio urbano Belluno-Feltre a sud del centro urbano.

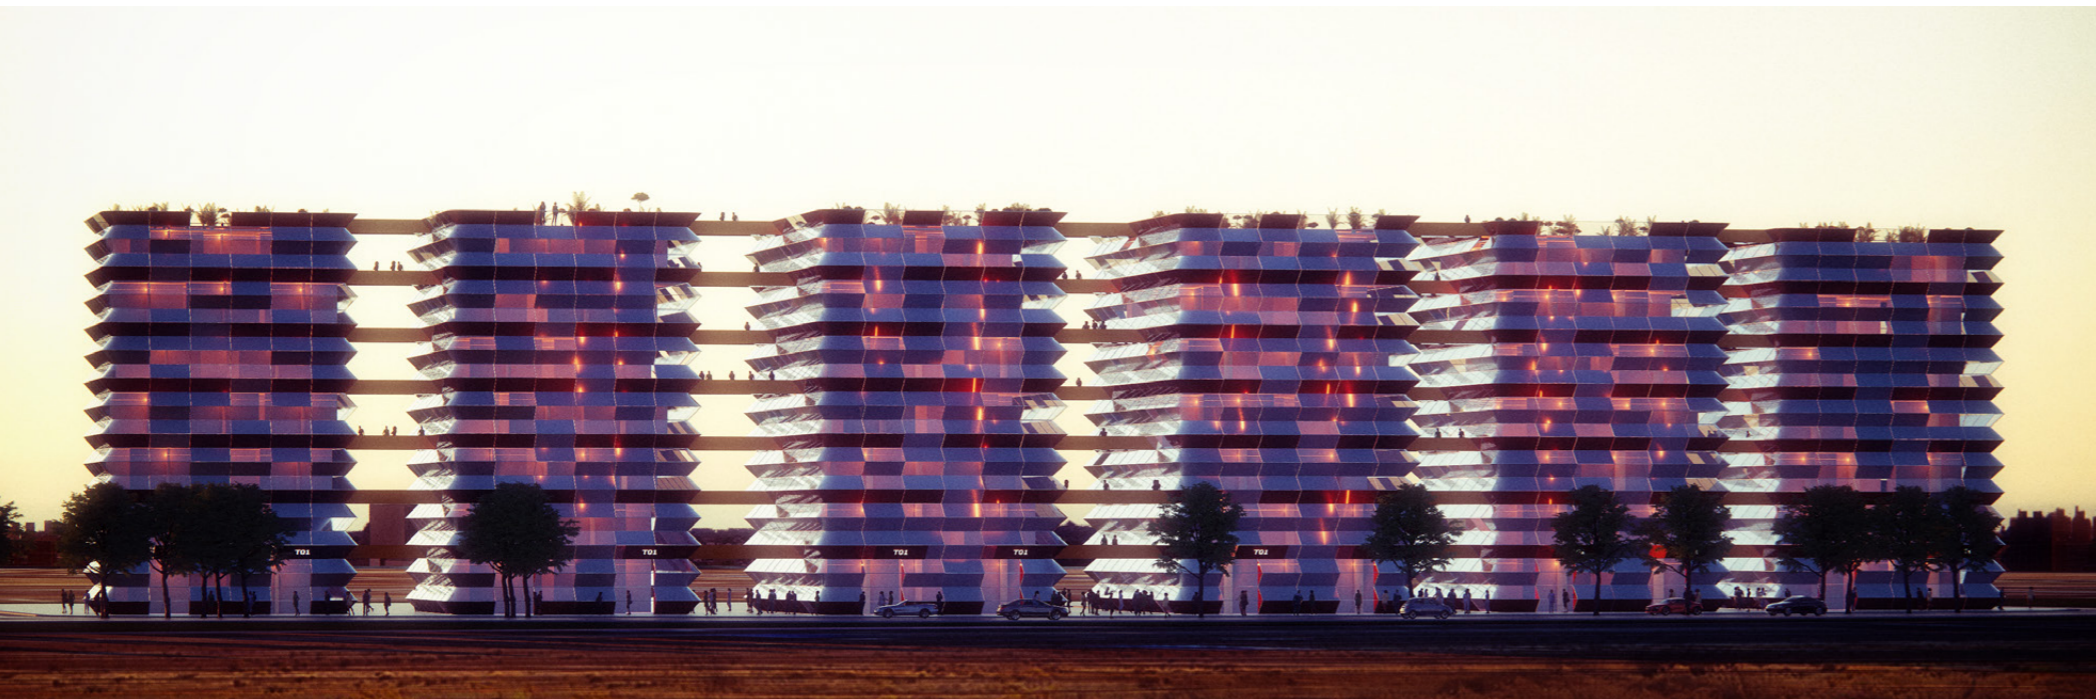

## PROGETTO

1. campo sportivo
2. scogliolo
3. stazione ferroviaria
4. volume di servizio
5. polivalente pedonale
6. centro "Star"
7. parcheggio
8. zona pedonale
9. nuova attività sportiva

Progetto di strategie che attraverso interventi architettonici puntuali e strutturali, cadenzati nel tempo, in virtù di risorse ed esigenze, permette di riconoscere i caratteri peculiari del territorio, di viverlo nella dimensione storico-naturalistica e di aprirlo a sviluppi futuri. Con la definizione di un circuito ciclo pedonale si riscopre il tessuto urbano e naturalistico. L'intervento procede con la riorganizzazione delle pertinenze degli edifici scolastici, del centro culturale e della piazza, legando quest'ambito all'area del complesso sportivo in cui il progetto di un edificio stazione - ponte che racchiude i servizi per le attività previste. Il potenziamento del sistema locale di trasporto su ferro, la deviazione del traffico veicolare su un percorso alternativo all'SSSO permette di accogliere l'utenza esterna al territorio comunale e di rafforzare quel ruolo di catalizzatore della vita sociale che l'ambito di riferimento è il Comune di Santa Giustina delinea per la sua posizione strategica lungo l'asse di percorrenza Feltre - Belluno.

## ABOUT ME

Deeply in love with my job, I have been working as an architect since 2000, after graduating with honors from the Faculty of Architecture in Palermo.

From the beginning I learned to master the IT tools related to design, very important in the development of an operational methodology that characterizes the development of each project to which I dedicate myself.

I have been lucky enough to work on many projects at different scales, first as a junior up to the role of team leader within various professional firms operating in Italy and abroad.

I consider transversality to all disciplines of design one of the most important skills for an architect.

History, sustainability, originality and attention to detail are the keywords that I use in my creative process, in a continuous confrontation and challenge with a fast and globalized world where unfortunately often form and aesthetics prevail in its aspects, albeit hyper-technological, more ephemeral.
